Welcome

To our 2026 Catalogue

Summer will soon be here, fingers crossed it's a good one!
Time to get your pond ready so you can enjoy those tranquil summer days.

Here at Bradshaws we've been working hard to make sure that we've got everything you'll need.

There are great new Oase FiltoClear pressure filters (p56) for big ponds, something we've been asked for a lot.

We'll also got a new range of Fountain Pumps (p35) and an Easy Clean Pressure Filter (p60) from UK brand Bermuda, with sizes to suit most ponds.

In the PondKraft range we've got new, more powerful, solar pumps, including lights for after dark (p28).
Enjoy your pond.

HOW TO ORDER

ONLINE: www.bradshawsdirect.co.uk

See our handy online pond calculators and internet only special offers.

BY PHONE: 01904 696933

Lines open: Monday to Friday 8.30am until 4.30pm
Saturdays 9am until 1pm

BY POST OR FAX:

Call us for an order form and SAE, fill it in, send it off and we'll do the rest.

Delivery charges

Orders over £50 - Free Next Working Day

Order Under £50 - 2-3 day from £3.99, Next Working Day from £5.99,
Saturday Delivery from £17.00

Click and Collect from Easingwold (YO61 3EQ) Free

Here at Bradshaws we are now recycling more than 95% of our waste and we are looking for solutions for the other 5%. We're also members of Recycle More, a website where you can check out recycling facilities in your area for electrical equipment (WEEE).

Times are tough for everyone at the moment so here at Bradshaws we've introduced a price match so you can buy with confidence.

If you see a product advertised for less give us a call and we'll match that price.

The product has to be brand new, in its original condition and packaging and be in stock. Auction items and those on eBay can't be price matched. The price needs to be published, in print or on the web. We'll verify the price before we give you the discount.

Buy with confidence

We want you to be happy with your purchase. If you're not for any reason give us a call on 01904 696933 and we'll arrange to swap or refund your item any time within 30 days of purchase.

Products in this catalogue may differ slightly from the published photograph. All products and prices are correct at time of printing (E&OE), subject to availability and may be subject to change (customers will be notified of any changes before ordering). All sizes and specifications quoted are approximate only. Whilst every attempt is made to deliver your order promptly and in perfect condition Bradshaws Direct denies any liability for consequential loss or expense caused by faulty items or delay in despatch or delivery. In the event of an express delivery arriving outside the specified time, your delivery charge will be refunded. This is the limit of our liability. We strongly recommend that no arrangements for installation involving third party contractors are made until you are in receipt of your goods and have checked that they are satisfactory. ©Tarpaulins Direct Ltd, reg'd in England 6444238, reg'd office Unit 2, Shire Bridge, YO61 3EQ.

5 Simple Steps

to creating your own perfect pond

1

Location and size

Avoid overhanging trees and boggy ground. Aim for the pond to get around 4-6 hours of sun a day. Mark it out with a hosepipe or rope so that you are happy with the size and position.

2

Start digging

Take your time – it's hard work! Plan for disposal of the soil you dig out. Make sure that the edges of the pond are level or part of the liner will be on show when the pond is full.

3

Measure the hole

Measure the hole that you've dug and then work out the size of the liner you'll require using our simple and easy-to-use calculator on page 6.

4

Underlay and liner

Put a 1" thick layer of damp sand on the bottom of your pond, next comes the underlay and then finally the liner. Then simply fill up your pond with water.

5

Edge the pond

Choose a way of finishing the edge of your pond. Here are some examples:

PondKraft Polyex Liners

PondKraft Polyex liners are exclusive to Bradshaws; we've been developing and improving them since 1980. Our Polyex liners are strong, flexible and can be guaranteed for a lifetime. They have a woven inner core between two outer layers that are UV stabilised with a rot resistant black/brown reversible finish.

Bottom Lamination

Inner Core
Super strong polyethylene weave

Top Lamination

FREE Permalay Underlay with any Lifetime guarantee Polyex Liner **Save up to £1463**

We can only offer our extensive guarantees on PondKraft Polyex when installed with Polyfibrelay or Permalay underlay (p9).

We have many more sizes available, simply call us or go online if you don't see what you need.

50.0 x 10.0	£2,008.99	£951.99

It's important to work out the amount of water your pond will hold and the size of liner you'll need. Use our handy guide to help with this. Alternatively go to our website and use the pond calculator or just give us a call!

Measuring your pond

To get an accurate measurement of depth, place a piece of wood or a broom across your pond and measure from that to the bottom of your hole.

What size liner do I need?

Max. depth Max. depth Length Overlap Total liner length

+ + + =

Max. depth Max. depth Width Overlap Total liner width

+ + + =

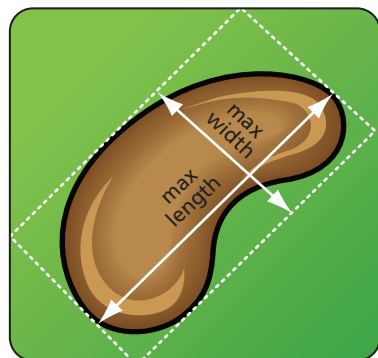

Multiply by 3.28 to convert metres to feet. Divide by 3.28 to convert feet to metres.

How much water will my pond hold?

Max. length Max. width Average depth Total pond volume

X X X =

metres metres metres

What Size Pump and Filter will I need?

A pond with lots of plants and no fish (or a few, small native fish) needs all of the water to be pumped through the filter every 2 hours.

We call this a nature pond.

A pond with some plants and some fish (mainly goldfish), needs all of the water to pass through the filter every 1 ½ hours.

We call this a goldfish pond, it is by far the most common type.

A pond with few plants and big fish, like koi, needs the water to be pumped every hour.

We call this a koi pond.

So if you have a pond of 3000 litres then your pump flow rate will need to be:

Nature Pond – Flow rate is 1500 litres per hour

Goldfish Pond – Flow rate is 2000 litres per hour

Koi Pond – Flow rate is 3000 litres per hour

Once you've worked out your pump flow rate turn to page 34 to choose a pump or if you have any questions give us a call.

Pond Liners

Choosing the right size liner for your pond couldn't be easier. Take a look at our handy guide on page 3, visit our website or call us for help and advice on 01904 696933.

Butyl Liners

Made from top quality 0.75mm thick, Swedish butyl, a type of rubber. Butyl stretches making it highly puncture resistant and easy to fit. Butyl liners from Bradshaws are guaranteed for a lifetime when installed with Polyfibrelay or Permalay. We supply butyl liners in almost any size – just give us a call.

Custom sizes get cheaper the more you buy.

Up to 10 m² price per m² is £20.99

Over 10 m² price per m² is £16.09

Over 64 m² price per m² is £13.79

7.5 x 4	£419.99
7.5 x 6	£624.99
8 x 8	£889.99

SealEco Greenseal EPDM

A high quality alternative to butyl liner. It is the same thickness as butyl, making it just as flexible and tough but is made from a different type of rubber, meaning the price is much lower. If you were looking to buy a butyl liner but want to save money, or you just want a great quality liner at a fantastic price then this is the one to choose.

Custom sizes get cheaper the more you buy.

Up to 10 m² price per m² is £17.99

7.5 x 6	£491.99
8 x 8	£686.99

Firestone Liners

Our most hard-wearing liner, made from EPDM rubber which is even stronger than butyl and more puncture resistant. At 1mm thick, it is thicker than butyl making it slightly more cumbersome, and it comes with a lifetime guarantee. If you need a heavy duty liner you can rely on for years to come, this is the one to choose.

Custom sizes get cheaper the more you buy.

Up to 110 ft² price per ft² is £2.79

Size in metres	0.5mm
6 x 5	£124.99
6 x 6	£142.99
8 x 6	£189.99

Stone Liner

Black PVC liner with a coating of fine pebbles. This is ideal for hiding the edge of a liner or making a stream look natural. Should be used over another liner as it is not guaranteed waterproof. Sold by the metre in 4 widths and now with a choice of Sandstone or Granite Grey.

Width metres	Sandstone per metre	Granite Grey per metre
0.4m	£14.99	£17.99
0.6m	£22.99	£25.99
1.0m	£34.99	£40.99
1.2m	£38.99	£46.99

Fixing Tape

To fix underlay in place (50mm clear tape 66m long).
£5.99

Polyfibrelay Underlay

Exclusive to Bradshaws, Polyfibrelay is a thick, soft material that won't rot and will last a lifetime. Designed to protect the liner from small stones or other sharp items in the soil, it's also good at protecting against root penetration. If you have stony ground then we recommend Polyfibrelay.

£2.75 per square metre

Underlay

Pond underlay is essential for protecting your liner from damage from stones and other sharp items. Our pond liner guarantees only apply when underlay is used.

Permalay Underlay

We searched high and low for the right material to replace our old underlay and this is it! We've taken a product that is used under reservoirs and adapted it for use in the garden pond. Incredibly strong, easy to lay and made to last a lifetime, Permalay will protect your liner for years to come.

£2.09 per square metre

Waterfalls

This range of highly realistic waterfalls is made from durable poly-resin. They each have a discreet water entry and will accept hose sizes 20-25mm (3/4 and 1").

Stainless Steel Blade Waterfalls

Stainless Steel Arc Waterfall

Just like the blade waterfalls (below) but now in this amazing modern design. Available in a choice of widths and with your choice of bottom or back inlet. Complete with a hoesetail for 20-32mm (3/4" to 1 1/4") hose. Please allow 7 days for delivery.

Fall width	Price	Fall width	Price
200mm	£115.99	600mm	£202.99
300mm	£135.99	700mm*	£223.99
400mm	£156.99	800mm*	£238.99
500mm	£187.99		

*Larger sizes have a 25-40mm (1" to 1 1/2") hoesetail

Stainless Steel Blade Waterfall

Give your pond a contemporary look with one of our stainless steel blades. They deliver a perfect sheet of water with amazing reflective qualities. These waterfalls can be fitted, fixed to or built into a wall. Each comes with a 1 1/2" BSP threaded inlet in the bottom or the back or either side - just ask. There's a hoesetail too that fits 25-40mm hose (1 - 1 1/2"). An ideal flow rate is between 6 and 14 litres per hour per mm of width e.g. 300mm wide needs between 1800 and 4200 lph. Please allow 21 days for delivery. For more sizes see our website.

INSTANT
PONDS**

Concrete Ponds

The strongest type of pond. If you get it right first time your pond will last for many years. However, this method of construction can be technically difficult, expensive and time-consuming. Foundations must be reinforced and the final layer of render should include reinforcement fibres and be sealed with G4.

Wizard Fibre

Render Reinforcement Fibres

Used in the construction of concrete ponds to add strength and increase crack resistance. Stronger, more durable and easier to use than polypropylene alternatives. Dramatically reduces the likelihood of leaks developing. High zirconia content offers superb alkali resistance. A 1kg pack of Wizard fibre can cover 8 to 18 sqm in 5mm thick render.

£17.99

G4 Concrete Pond Sealer

If you have decided to make your pond from concrete then you will need to seal the top layer of render to stop the water getting in and the lime, which is harmful to fish, getting out. The best way to do this is with G4 Sealer. You don't need a primer, just paint it straight onto the concrete. There is a choice of clear (dries translucent) black or grey. You can also use G4 to coat flagstones, waterfalls, statues and other concrete products to make them safe for your pond.

Colour	Weight	Price	Colour	Weight	Price
Clear	500g	£16.99	Black	500g	N/A
Clear	1kg	£27.99	Black	1kg	N/A
Clear	2.5kg	£53.49	Black	2.5kg	£77.99
Clear	5kg	£84.49	Black	5kg	£130.99

Clear: 3 coats – a total of 550g per square metre (g/m²) that you will cover.

Black: 2 coats of Clear first then two coats of Black. That's 410g/m² of Clear and 400g/m² of Black.

Sealants and Repair Kits

Gold Label Pond Sealer

An excellent sealer for sticking liners together and sealing all kinds of joints. Can be used underwater. Seals plastic, rubber, PVC etc. Comes in a tube that requires a standard skeleton gun (mastic gun). 290ml. Black or clear. Not suitable for Polyex Liners.

Black £22.99 Clear £22.99

Liner Repair Kits

These kits contain a tube of Gold Label One Shot Pond Sealer and a patch made from high quality .75mm Butyl pond liner. The surfaces need to be clean for the patch to stick but it will work underwater. Not suitable for polyex liners.

Patch Size 30x30cm £18.99

Patch Size 50x50cm £19.99

Patch Size 100x50cm £22.99

"One Shot" Gold Label Pond Sealer

Self propelled version of the Gold Label Sealer. No need for a gun – ideal for tight spaces. Black. Not suitable for Polyex Liners.

75ml Clear £15.99

80ml Black £15.99

Polyfix Tape Kit

Two tapes; one double-sided (5m long), one single-sided (10m long) for joins and repairs.

£13.99

Butyl Liner Joining Tape

For joining liners. 10 metres by 50mm.

£1629.99

Wooden Raised Ponds

10 year guarantee on 44mm thick wood 5 year guarantee on 27mm wood. 5 year guarantee on the liner.

There's no easier way to build a pond in your garden. Make a firm, level base then the panels just slot together. An easy job for a Saturday morning meaning you can get on and start enjoying it.

These wooden ponds feature a unique slot system, coupled with tongue and groove panelling to make the strongest pond on the market. They are made in Britain and built to last.

The kit comes complete with a liner that has a 5 year guarantee. The pond can be sited on grass, soil or concrete and because of the special wood treatment that's used it can even be partially or fully set in the ground without affecting the warranty. The treatment is play park friendly and so it is perfectly safe for your garden.

Prices start at £267.99 and are available in Square, Rectangular and Octagonal, they also come in a wide range of sizes and depths, starting at 1m x 1m. There are two different wood thicknesses available, 27mm thick or 44mm thick panels. Look at our website for the complete range. Delivered to the roadside, larger sizes are on pallets. Please allow 21 days for delivery.

Patio Ponds

Hozelock Outdoor Aquarium

Top of most people's wish list for their garden is the gentle, relaxing sound of water and a place to enjoy the calm that it creates. Watching your fish as they gracefully move around the depths is a great way to retreat from the pressures of modern life.

That's all well and good but putting in a pond is a bit of an undertaking and an easier option will be welcome for some people. That's where trusted UK manufacturer Hozelock come in. They've made an incredibly simple to install, great looking pond that anyone can have.

With no digging, no tools and a 30 minute set up time this is the easiest pond we've ever seen. The viewing windows let you follow your fishes' antics from your favourite seat and the rattan effect panel will look great alongside most garden furniture.

- Pond Capacity 500 litres
- Dimensions 95cm square by 70cm high
- Rattan effect
- No tool, 30 minutes install

£324.99

To add a fountain and to keep the water clear the Easyclear 3000 is perfect. It has only one wire, that you can plug in, and is just the right size for this pond. When you buy the pond you can buy the Easyclear for ½ price at only **£74.99**.

Only £74.99

Hozelock Pond Vac

3 year guarantee

The Hozelock Pond Vac has chopping blades which allow the removal of large pieces of debris without blockage.

- Three interchangeable heads
- 10m cable
- 3m waste hose
- Extendable handle up to 2m
- 80 watt pump

Was ~~£277.99~~ Our Price **£159.99**

Online Video

Handle

Extends up to 2 metres.

Motor

Reliable and cheap to run.

Heads

Interchangeable for different jobs.

In-Pond Vacuums

This is the latest innovation in pond vacuum technology. A powerful pump on the end of a stick! Put the vacuum in the pond and it will push a constant stream of dirty water and sludge up the tube and out of the pond. Cheaper to run than a comparable vacuum, these products can really clean up!

Pond-Side Vacuums

These vacuums sit at the side of your pond and suck silt and sludge from the bottom of your pond like a vacuum cleaner.

Online Video

Oase Pondovac 5

A totally new Pondovac that solves the only possible problem with the earlier models. As well as continuous suction it also pumps the waste out of the vac with a separate motor. This means you can position the Pondovac next to your pond and the waste pipe can go up, over a wall maybe or to a drain that's higher than your pond. It is also more powerful and with an improved flow rate over the Pondovac 3 and 4.

RRP £899.99 Our Price £799.99

Oase Pondovac 3

This vacuum has a two chamber system that gives it continuous suction, there's no more waiting around for it to empty.

RRP £499.99 Our Price £299.99

Oase Pontec PondoSolar Air 150 Plus

2 year guarantee

German engineered solar air pump. Features the latest Lithium ion rechargeable battery technology so it charges in the day and you can aerate your pond any time, even at night.

- Simple installation – position anywhere
- 150 lph capacity
- 2m airline with air stone
- Ground stake and mounting bracket

RRP ~~£49.99~~ **Our Price £37.99**

PondKraft Solar Floating Oxygenator

1 year guarantee

The simplest air pump ever. Take it out of the box, place it on your pond and that's it. When the sun shines on the panel the pump will work adding oxygen to your pond. No running costs, no cables and no worries.

- 100lph capacity
- 50cm airline with air stone

£29.99

PondKraft Compact Solar Air Pump

1 year guarantee

Solar Air pump with battery, aerate your pond anytime, even at night.

- Pump is built into the panel
- 80 Litres per hour
- 2m airline with stone

RRP £61.99 Now £39.99

PondKraft Solar Oxygenator

1 year guarantee

No need to plug into the mains, just put the solar panel in a sunny spot and it starts automatically. This means that your fish get extra oxygen when they need it most (in hot weather) and you don't have to pay any running costs or deal with any wiring. Suitable for a small to medium sized pond.

- 100lph capacity
- 2m airline with 1 air stone
- 3m cable to solar panel

Was £24.99 Now £19.99

PondKraft Twin Outlet Solar Oxygenator with Battery

1 year guarantee

This pump will charge when the sun is shining, you can set it to run either in the day or at night time using a button on the panel. It's better for ponds to have air added during the night as this can be when oxygen levels are at their lowest.

- 200lph capacity
- 2 air stones
- 2m airline with each stone
- 3m cable to solar panel
- Can be charged via USB

£54.99

Solar Pumps

PondKraft Solar Fountain Pumps

1 Year guarantee

The easiest way to add a fountain! Works at night!

This range of fountain pumps lets you have a fountain without a mains connection, and without running costs using the power of the sun.

Each of the pumps has a built-in battery in most cases it's the ultra-modern lithium ion type that stores more power.

All these pumps have LED lights that fit around the fountain stem and light it up so you can enjoy your water feature after dark.

They all have a memory function, if you turn it on at 5pm it will run as long as it can then turn off. Next day it will turn on again at 5pm and every day until you set a new time.

All-in-One Pumps

New for 2026 – Fountain Kit and Aeration Kit included with every Filtral Oase Filtral All-in-One 2 year guarantee

The Oase Filtral is the easy way to a healthy pond. It combines a pump, filter and UVC in one modern, compact unit that sits in the pond giving you clean, clear water. There's only one wire to connect so it's simple to set up and won't spoil the look of your pond.

The new design has easy to open clips on the cage and the fountain head can be left in place when the filter is opened for cleaning. Each model contains two different foams, bio media and filter granulate.

Optional Aeration Nozzle, this acts like a snorkel drawing oxygen from the pond surface and into your pond. More oxygen makes the filter work better and keeps fish healthy.

Oase Pontec PondoReil 1500 UVC Solar

2 year guarantee

All-in-One Solar Pump, Filter & UVC – Keeps Ponds Clear & Healthy

Enjoy crystal-clear pond water with the Oase PondoReil UVC Solar, a compact underwater filter that combines a pump, filter, and UVC technology in one easy-to-use unit. Designed for small ponds, this environmentally friendly system does not need mains power, using a 15W/12V solar panel, ensuring efficient filtration with no electricity costs.

Enhance your pond's beauty with two included water feature nozzles (volcano & bell), creating stunning displays up to 1 metre high. The integrated biomechanical filtration system—featuring foam, ceramic rings, and filter rock—works with a UVC light to effectively combat green water and keep your pond healthy for fish. Ideal for any small pond, the Oase PondoReil UVC Solar is the perfect low-maintenance solution for a vibrant and clean aquatic environment.

Eco-Friendly Operation – Runs on solar power, reducing energy costs and carbon footprint.

Flexible Power Options – Can be optionally connected to mains power on cloudy days.

Effective Water Filtration – Advanced biomechanical filtration and UVC technology ensure clear, healthy water.

5 metre cable to connect

Installing a fountain

Fountain pumps come with everything you need to create a range of effects. Ensure you choose a fountain height to suit your pond.

Most will also let you run a small waterfall or feature (like a spitting frog). If you want to do this then you'll need a more powerful pump. Go up one size for a spitter, for waterfalls use the table on page 40.

All our fountain pumps come with a 10m mains cable. We advise using a circuit breaker (RCD) for safety.

(A) 1 Tier Fountain

(B) 2 Tier Fountain

(C) Geyser Jet

(D) Bell Jet

Telescopic Stem
Lifts the head clear of the water.

T-Piece with flow adjuster
Lets the pump work two things at once and lets you control each one.

Hosetail
Connects features & waterfalls via a hose.

Pump Cage
Stops dirt getting into the pump.

Extra Fountain Heads
For different effects, see above.

Bermuda Fountain Pumps

3 year guarantee

Bermuda Fountain Pumps are for creating decorative fountains, powering water features, or supplying small pond filters.

A foam-free filter casing means less maintenance and cleaning. With adjustable flow control, you can fine-tune the water output to achieve the desired fountain effect or suit your specific setup.

Key Features

- Includes multiple fountain heads
- Secondary outlet for running a water feature/spitter on models 2000 and up
- Adjustable flow rate for precise control on models 2000 and up
- Hosetail adaptor included for just running a water feature/spitter
- Foam-free filter casing for reduced maintenance
- 10 metre power cable for flexible installation

Oase Aquarius Fountain Set Classic

3 year guarantee

Made by German company Oase, these fountain pumps are compact and reliable. The high-quality strainer cage means that there's no need for a foam filter and when its time to clean the cage you just need to squirt it with a hosepipe. Complete with a fountain stem and tee piece so you can power a waterfall at the same time as your fountain (2000E model and above). There's a choice of fountain heads and the fountain can swivel to an angle so that it points straight up even if the pond bottom isn't level. The E versions are new this year and use up to 40% less electricity than the earlier models they replace.

Fountain Pumps

Bermuda Feature Pump

1 year guarantee

This compact pump from Bermuda is small enough to fit in tight spaces but powerful enough to put on a show. It's a great replacement for the pumps found in self-contained water features like those from Henri and others. These pumps don't have a fountain head they just attach to a hose. A dial lets you control the water flow.

PondKraft Fountain Pump

3 year guarantee

Part of the great value PondKraft range of pond equipment these quality pumps have an easy maintenance 'no-clog' cage and come with a range of fountain attachments. Each one also comes with a telescopic extension pipe and a T piece so you can run a waterfall or spitting feature too.

Model	Fountain Height Max	Fountains Included	Max Flow lph @ 1m Head	Hose Size mm	Running Cost Watts	Was	Now
PondKraft 5000	1.8m	B, C, D	3300	20-32	99	£104.99	£89.99

Draper SWP IFS

1 year guarantee

Ideal for general usage around the home and garden, including irrigating gardens, draining cellars/basements and even powering waterfalls/fountains etc. Both models of this pump come with a new design internal float switch. This is more accurate than the older style. It can also be overridden so you can turn the pump on and off manually.

- Accepts 5mm solids
- Outlet size 25/32mm

Installing Pumps for filters and waterfalls

This is the kind of pump you need to run a filter and/or a waterfall. They're designed to suck in big bits of dirt from the pond and send them to the filter, so they rarely clog up and need very little maintenance.

Water is pumped out of the pond and into the filter, coming back down a waterfall or via a return pipe. You need a pump that moves the water fast enough to keep the pond clean.

What size do I need?

Use our guide on page 6 to work out how much water your pond holds and calculate your pump's flow rate.

Pumping uphill

Pump flow rates are reduced when they pump uphill. An Aquaforce 6000 will pump 6000 litres an hour on the level, if it is pumping the water 1m (3'3") higher than the pond surface it'll pump 4750 litres per hour. In most ponds the water is lifted around a metre out of the pond so all our pumps show the flow rate at 1m (3'3"). For different heights give us a call and we'll advise on the type of pump you need.

What pump do I need for my waterfall?

Width of waterfall		A thin film of water over a ledge	
Inches	cm	Gallons	Litres
6	15	300	1400
12	30	900	4000
16	40	1300	6000
20	50	1650	7500
24	60	2850	13000

When choosing consider

Solids Handling – the size of particles that can pass through the pump – the bigger the number the less often it will block up.

Running Cost – filter pumps must run 24 hours a day so low wattages can mean big savings.

Extra Features – some pumps have two inlets and can be used with a skimmer, some can protect the wildlife in your pond from harm. Have a look at the pump description for details.

Variable Flow – Some pumps have a controller that lets you change the flow rate, great for the winter or to slow down a waterfall (see page 46).

All our filter pumps come with 10 metres of cable for connection to the mains and we advise a circuit breaker (RCD) for safety. They can also take different hose sizes. Always use the biggest hose size that your pump and filter will allow or you'll lose flow rate.

Pump Cage

Allows solids to enter the pump but stops those too large from passing through.

Inlet Hosetail

Not present on all filter pumps. Allows connection to a skimmer or satellite strainer so the pump sucks water from the skimmer.

Cage Clips

The cage opens for cleaning and maintenance.

Outlet Hosetail

Connect the hose here and direct the water to the filter or waterfall. Trim the hosetail page 51..

Ball Joint

Point the hose in any direction.

Bermuda Filter Force Filter Pump 3 year guarantee

Great value pumps that are designed to be cheap to run and maintenance-free. They're perfect for running waterfalls or filters and can keep running 24/7.

Bermuda is a great UK brand that has many new and innovative products.

These pumps are perfect to run waterfalls or filters and they are designed to run 24 hours a day all year. They are quiet and easy to clean. The holes in the outer cage will allow solid particles up to 6mm in size to pass through and these will then end up in your filter, keeping the pond clean. Bermuda Filter Force solids handling pumps are ideal for passing dirty pond water to filters, or supplying large volumes of water to watercourses. Economical and capable of passing large solids, Filter Force provide year round performance, with the minimum of maintenance necessary.

- Economical to run
- Powerful and durable
- Accepts up to 6mm solids
- Fits hose size 20-40mm

Filter Pumps

Oase Aquamax Eco Premium

5 year guarantee*

Aquamax Eco Premium has long been the market leader in performance, reliability and cutting-edge technology, now there's a brand new version for 2024. Core 6 technology allows the pump to intelligently refine its energy consumption, only using the power that's needed and lowering running costs even further. The high-performance pump core rotates with an unprecedented smoothness that redefines pump efficiency. Every model now includes SFC, seasonal flow control, for even lower running costs in the colder months. Flow rate and energy consumption are reduced once temperatures are below 17°C and even further below 10°C. This feature can be turned on or off to suit your pond. On the 17000 model wattage is reduced from 140 to 45 watts by this feature.

These pumps are now fully controllable with the Eco Control or can be integrated into the Oase Control System via InScenio FM Master Cloud and Oase Control app.

- Even lower running costs
- Extremely quiet
- Even more durable
- SFC across the range
- Second inlet, allowing connection of a skimmer
- Can be dry installed

Variable Flow Filter Pumps

Variable Flow Filter Pumps

These are filter and waterfall pumps that allow you to control the flow rate via a control panel or an app. Being able to control the flow can have several advantages:

- Use less electricity
- In the winter not as much water flow is needed for filters and oxygen
- Make a waterfall slower and quieter on a night so you don't annoy the neighbours
- Match the flow rate to existing equipment like filter boxes
- Increase flow when more oxygen is needed in the summer

Evolution Aqua Varipump

From £209.95

The Evolution Aqua Varipump is a controllable pond pump that's suitable for large ponds. It features a six pole, three phase motor and is reliable and quiet when running. The Varipump is powerful enough to run the largest ponds and filters, in the most demanding of situations. It can also be used in and out of the pond, and hosedtail fittings are included.

- Powerful controllable pumps suitable for large ponds
- Output and energy consumption can be controlled at the push of a button
- A 6 pole 3 phase motor that is quiet and reliable
- Powerful enough to run the largest of ponds and filters
- Suitable for use in and out of the pond
- Hosedtail fittings included

Variable Flow Filter Pumps

NEW

Bermuda Filter Force Variable Control Filter Pump

2 year guarantee

The Bermuda Variable Control Filter Force range offers high-performance submersible pumps designed to handle solids with ease. Flow output can be adjusted quickly and accurately using the included wired control unit, allowing you to tailor performance to your pond's requirements.

Ideal for moving dirty pond water to filtration systems or supplying water to streams and waterfalls, these pumps are energy-efficient and well suited to medium and large ponds. Built for reliable, year-round operation, they deliver strong performance while requiring minimal ongoing maintenance.

Key Features

- Simple flow rate adjustment via control panel, from 0 to 100%
- Robust, fully submersible pump design
- Suitable for medium to large garden ponds
- Hose size 25 – 40mm

Oase PondoMax Eco Control

3 year guarantee

Smart. Compact. Powerful.

The PondoMax Eco Control is the ultimate solution for maintaining crystal-clear ponds. With flexible performance management, a 7-stage power adjustment, and an integrated error indicator, this compact powerhouse ensures efficient water circulation and filtration. The largest model delivers up to 20,000 litres per hour, making it ideal for filters and watercourses.

Why Choose PondoMax Eco Control?

- Clear & Healthy Water – Effectively transports dirt particles up to 8 mm
- Energy-Efficient & Reliable – Protected against dry running and blockages
- Smart Control – Adjustable power levels for tailored performance
- Flexible Installation – Works immersed or dry, adapting to any setup

Upgrade your pond care with the PondoMax Eco Control – where performance meets precision.

Bermuda Powered Surface Skimmer 3000

1 year guarantee
The Bermuda Pond Skimmer is a compact yet durable floating skimmer with a built-in pump, designed to remove debris directly from the pond's surface. Just connect to the electricity supply and float the skimmer on your pond. Surface matter is drawn in and collected in the basket, which can be emptied into a bin or composteur. Can be free floating or tethered with the included control line. 3,000 LPH pump suits ponds with a surface area of up to 20m². Running cost 43 watts.

£74.99

Oase Swimskim CWS

This floating skimmer from Oase clears the pond surface of leaves and other debris that cause pond problems. It has a built in pump that drags the debris into an easily emptied basket. There's a whirlpool feature that stirs up the pond bottom and an aerator function that supplies the pond with valuable oxygen.

- 3500 lph pump built-in
- 600 lph aerator function
- For ponds up to 50m²
- Only 45 watts
- 3 year guarantee

Flexible Tube

Height Adjustable

Velda Ultra Skimmer

The Velda Ultra Skimmer is easy to set up and use without tools. The height of the skimmer is adjusted by pulling out the flexible tube from a minimum depth of 1 metre to a maximum of 1.8 metres. It is suitable for a pump rate of between 5000 and 15000 litres per hour. The base can be weighted with gravel or stones. Suitable for large ponds up to 100 m². Use a 25-40mm hose to connect to your pump.

£118.99

Oase SwimSkim 25

Includes a venturi device which adds oxygen to your pond. Built-in 2500 litres per hour pump. Suitable for ponds up to 25m².

RRP ~~£189.99~~ Price £134.99

PondKraft Pond Surface Skimmer

This skimmer has a base that sits on the bottom of the pond. A riser pipe takes the skimmer head to the surface. Can be used in depths of between 300-800mm and will self adjust for variations in the water level up to 160mm (max. depth is 800mm). Use a 25-40mm hose to connect it to a solids handling pump with a flow rate of 4000-16000 lph. Ideal for use with the Oase Aquamax Premium (p.44).

£49.99

Hose and Fittings

Picking the right size hose

Picking the right size hose is easy. Just look at your pump's outlet size (in mm) and your filter's inlet size (in mm). Pick the largest one that appears in both and that is your hose size. It's important to choose the biggest hose size you can as this will maximise the water flow. Or you could just give us a call on 01904 696933 and we'll do the rest.

Example:

Aquaforce 2500 pump (p42) outlet size is 20-40mm connecting to a Revolution 6000 Filter (p58) inlet size 20-25mm. The biggest size that they will both take is 25mm so that is the size you should choose. Other fittings should always be the same size as the hose, so if you have 25mm hose you need 25mm clips, taps etc.

Attaching a hose

Follow the stages pictured below. Always use the biggest size hose you can to maximise water flow. In our pictures we show the hose tail removed from the equipment, you can leave yours attached to your pump, filter or UVC while you make the connection if you wish.

Hose tail on pump, filter or UVC

Trim the hose tail to suit your hose

Put clip on hose and then hose on tail

Tighten up clip to make it watertight

Y Adaptor

3 way reducer allows the connection of different hose diameters. Fits 12, 20, 25, 32mm.

£14.99

Mini Uni Adaptor

2 way reducer to fit hoses 12, 20, 25mm.

£9.99

Oase Water Distributor

4 way adaptor. inlet suits hose size 20-30mm (3/4" to 1 1/2"). One of the outlets can be capped off, flow tap on each outlet. Choose outlet size.

25mm (1") **£39.99**

Pipe Repair Tape

3 metre tape that sticks to itself making a waterproof seal. Great for wrapping around hoses, joints and anywhere you have a leak.

£8.99

Power Supply

Oase Tradux Wall and Liner Transition

Forget trying to hide a cable or hose as it runs over the edge of the pond. Tradux enables you to put cables or hoses through the side of a pond liner below the surface of the pond. Pumps, filters and lights can be invisibly supplied with power or water flow.

£49.99

Weather Proof Plug and Socket

A socket and plug that lets you join two cables together then disconnect them without unwiring. Perfect for taking a pump out in the winter or adding a heater for a few months.

- Takes cables from 5mm up to 9mm in diameter
- Seals to IP68 standard

£44.99

Lotus 3 Way Weatherproof Connector

Power two devices from one mains cable. Run two pumps or a pump and UV. IP68 rated.

£26.99

Underwater Cable Connector

Makes a safe joint between two cables underwater. IP68 rated.

£25.99

Pond Electrical Cable

Waterproof, 3 core, 0.75mm² cable sold by the metre. Use to connect filters, ultraviolet clarifiers and junction boxes.

£1.99 per metre

Heissner Outdoor Power Box

A dry storage box for all your garden cables including lights, pond pumps, mower cables and more. The box is lockable for safety and is very strong with an 80Kg load capacity. Big enough for extension cables, power blocks and transformers.

£44.99

Junction Box for Standard or Armoured Cable

Power up to 6 electrical items from one cable. Weatherproof for use outdoors. Full instructions for easy installation. Choose from standard or armoured cable for the mains feed wire and choose the number of outlets. Max load per outlet 360 watts. Total load 1200 watts.

Standard Cable

3 Way £34.99

4 Way £42.99

6 Way £55.99

(with quick change fuse)

Armoured Cable

3 Way £44.99

6 Way £62.99

Blagdon Powersafe Switch Box

Allows you to connect up to 5 electrical items to one cable. Full colour diagram makes installation a doddle and the LEDs show which equipment is on or off at a glance. 2-year guarantee and push-button on/off switches. It has individually fused outlets which means that if your UVC blows a fuse your pump should stay on. The maximum load for one of the outlets is 1000 watts and for the remainder it is 300 watts each.

3 Way Box £69.99

5 Way Box £114.99

Spare Fuses for Powersafe Switch box

1000 Watt 5A Fuse £1.99 **300 Watt 1.5A Fuse £1.99**

Installing a pond filter

A filter keeps your pond water clean and safe for your fish. If you get the right one then you'll never have green water again.

All filters need a pump to push the water from the pond and into the filter. They contain various types of media that clean the water mechanically (like a coffee filter) or biologically (using friendly bacteria).

Almost all filters come with an Ultra Violet Clarifier (UVC), that stops the pond going green. You'll need to clean the filter out from time to time when the flow out of it is reduced. Always clean the media with pond water to protect the friendly bacteria.

Most UVC filters come with a 3 metre cable to connect them to the mains. Unlike pond pumps this cable can easily be replaced if a longer one is needed.

The bulb in your UVC filter should be replaced every spring (*even if it still lights up*).

What size filter do I need?

Your filter's maximum flow rate should be at least as much as the output from your pump.

If your chosen filter is bigger (i.e. has a higher maximum flow rate) than you need then that's fine, it means you'll have to clean it out less often.

To work out what pump flow rate you need turn to page 3, to look up the flow rate of your pump turn to pages 34-47.

Ultraviolet Clarifiers (UVC)

UVC's work together with a pump and a filter. Separate UVC's like those on pages 70-72 are for adding to an existing pump and filter system which doesn't already have a UVC or a system where the UVC needs replacing.

Where do I put my filter?

These diagrams show the main ways to install a pump and filter.

- A.** Box filter is put at the top of the waterfall (usually with a built-in UVC).
- B.** A UVC can be added in line if you are upgrading an older system.
- C.** Pressurised filter sited below top of the waterfall and partially buried, so it's easier to hide.

31000 model

Oase FiltoClear from only £299.99 3 year guarantee

The FiltoClear has a valve that lets you flush the filter clean without taking it apart and a handle that squashes the foams to remove more of the sludge. This new version boasts:

- Increased UVC power and new UVC housing
- Better cleaning with improved sponges and simpler pull-out mechanism
- Easy to replace the UV lamp (no need to remove the quartz glass)
- Improved easy to use clamping ring
- 19/31000 sizes have a patented UV cleaning rotor

New 60000 and 90000 sizes added.

Each of these have two 2" inlets and two 2" outlets.

Suggested pumps: 60000 - 2 x Aquamax Eco Premium 17000 or Aquamax Eco Expert 36000

Hozelock Bioforce Revolution

2 year guarantee

Pressurised filter and filter kit with a revolutionary cleaning function. Kit comes complete with a Hozelock Aquaforce pump.

This cutting edge filter comes with:

- High Power UVC that will give you clear water, guaranteed
- Mechanical filtration - Cypricubes, small cubes of foam that can be cleaned effectively
- Biological Filtration - Kaldnes K3 for maximum surface area

When it comes to cleaning, the winding handle on the top moves the foams around and makes it possible to clean them completely. This is different from all other pressurised filters that simply back flush, cleaning the surface of the foams but not all of the foam. The filter can be buried at the side of your pond so that it fits in with your garden.

The 18000 and 28000 kits contain 2 Bioforce Revolution Filters. These are joined together by a T piece that fits in the hose. 40mm hose is recommended. Each kit comes with 1 pump, either an Aquaforce 15000 or a PondKraft Eco 18000 (see table below).

Pressure Filters

Bermuda Easy Clean Pressure Filter

1 year guarantee

Easy to hide and easy to clean

The Bermuda Pressure Filter offers a complete filtration solution by combining both mechanical and biological filtration with an integrated Ultra Violet (UV) clarifier, helping to keep your pond water crystal clear and healthy all year round.

Maintenance is simple and hygienic. The filter features an easy-to-use built-in cleaning mechanism—just switch to the “waste” position and turn the handle to flush away dirt and debris. Foams are rinsed thoroughly and you don't have to get your hands dirty.

Note: the self-cleaning system is not available on the 5000 model

Available as a filter on its own, or with the correct sized Bermuda pump as part of a kit.

Key Features

- Easy to install and maintain
- High-performance filtration with mechanical, biological, and UV clarification
- Built-in cleaning device allows hands-free flushing of dirty water (not on 5000 model)
- Suitable for feeding streams, waterfalls, or returning water discreetly to the pond
- Hoze Size 5000 model 25, 20,12mm 10/15,000 40, 32, 25mm

Bermuda Box Filter

The Bermuda Pond Filter Kit offers a simple and effective solution for maintaining clear, healthy water in small to medium garden ponds. Each kit includes a correctly matched filter box and UV clarifier, working together to remove debris, support beneficial bacteria, and combat green water caused by algae. Routine maintenance is quick and easy, with filter sponges cleaned by simply pulling a handle, reducing the need for hands-on cleaning and helping maintain consistent performance. Also available as a standalone filter box with a built-in UV clarifier, if you already have a suitable pond pump.

Key Features

- Easy to install complete filtration solution
- Quick and convenient sponge cleaning mechanism
- Inlet Size 20mm Outlet size 50mm
- Suitable for installation in or above ground
- 5m Hose and clips included for simple setup

Hozelock Ecopower+ Filter

2 year guarantee

Re-designed and including advanced K3 media and enhanced safety features.

You can attach a 40mm (1½") hose to the outlet of this filter. It only goes level or downhill but this makes it more flexible than the outlet from other box filters.

- Venturi – adds air to the water, which is great for fish health and promoting growth of good bacteria
- Turbulator – for improved UV performance
- Sludge Drain for easy cleaning
- Inlet Hose size 25–40mm

When you add a pump you get the Hozelock Filtration Kit. Perfect for your first pond it contains everything you need to keep it clean and clear – guaranteed. Includes an Ecopower+ filter with UVC, a Cascade or Aquaforce pump, 5 metres of hose and clips. All with the quality you'd expect from a household name. Just choose the right size for your pond.

Pontec Multiclear Set

2 year guarantee

The Oase Pontec Multiclear is a complete kit that includes everything you need for a clean and clear pond.

The filter box contains three sections of foam that remove the waste particles from your pond water straining them out to give you clear water. Friendly bacteria will colonise these foams. These bacteria change the toxins present in fish waste back into plant food. The design of the bio media ensures a good rate of water flow through them too.

On top of the filter box is a compact Ultra Violet Clarifier (UVC). The water flows through this first before going to the filter and it makes any green algae stick together. These can then be strained out by the filter foams giving you crystal clear water.

Each Pontec Multiclear comes with a filter pump that goes into your pond and pushes the water through a hose (supplied) into the filter box. The cage that surrounds the pump lets in quite big pieces of solid debris meaning that the sludge ends up in your filter and not in your pond. The pump should only need occasional cleaning.

- Clear water guaranteed
- Filter, pump and UVC
- 3m Hose included
- German engineering

Lotus Green Genie

1 year guarantee

Green Genie filters have been a firm favourite with Bradshaws customers for many years and this year the first four models in the range have been improved, now featuring a more powerful UV light. The Green Genie grants the pond keeper's three wishes - "Clear Water, Clean Water and Healthier Fish". Layers of foam remove the solids while the UV light gets rid of the algae that cause green water. If you need a pump to go with your Green Genie why not add the Bermuda Fountain Pump (p35), or the Pontec Pondomax (p42) or the more powerful Bermuda Filter Force (p43). These highly reliable pumps are cheap to run and great value.

Ultraviolet Clarifiers

Ultraviolet Clarifiers

Ultraviolet clarifiers (UVC) work together with a pump and filter to give you crystal clear water. The UVCs on this page are for adding to an existing pump and filter system without a UVC or where the UVC needs replacing.

PondKraft Stainless Steel UVC 2 year guarantee

This high power UVC has a stainless steel case. This allows up to 35% more UV light to be reflected back onto the water and ensures a long life for the unit. The high power bulbs are highly efficient and easy to change. Hosetail will fit 25, 40 or 50mm. Can also fit 2" solvent weld.

Bermuda UVC

2 year guarantee

The Bermuda UVC is an essential addition to any pond filtration system, helping to keep water clear and healthy throughout the year. A wide range of wattages means there's a Bermuda UVC that's right for your pond.

- Easy to change the lamp (bulb)
- Translucent hoesetails lets you check if it is working
- Mounting brackets
- Hose size 40, 25, 20, 12mm (40mm is fitted without using the hoesetails)

Model	Max Flow lph	Goldfish Pond Size	Watts	Price
8 Watt	1800	3600	8	£74.99
10 Watt	2250	4500	10	£79.99

UVC 18 Watt	7500	6600	18	£89.99

Ultraviolet Clarifiers

NEW

OASE Vitronic UVC Clarifier

2-year guarantee

Keep pond water clear with the OASE Vitronic UVC. It uses powerful UVC radiation to destroy the cell structure of floating algae, helping prevent green water and algae blooms—especially during spring.

Simply install the clarifier between your pond pump and filter. As water passes through, algae clump together so your filter can remove them easily. An inspection window lets you check that the UVC lamp is working.

- Effective against floating algae, bacteria and pathogens
- Quick installation between pump and filter
- Compatible with most pond filters
- Inspection window to check lamp operation (except 11 W)
- Easy bulb replacement

Picking the right size hose

Picking the right size hose is easy. Just look at your pump's outlet size (in mm) and your filter's inlet size (in mm). Pick the largest one that appears in both and that is your hose size. It's important to choose the biggest hose size you can as this will maximise the water flow. Or you could just give us a call on 01904 696933 and we'll do the rest.

Example:

Aquaforce 2500 pump (p42) outlet size is 20-40mm connecting to a Revolution 6000 Filter (p58) inlet size 20-25mm. The biggest size that they will both take is 25mm so that is the size you should choose. Other fittings should always be the same size as the hose, so if you have 25mm hose you need 25mm clips, taps etc.

Collector Basket

Moving Screen

Foam Bio Media

Oase Biotec Screenmatic² 3 Year Guarantee (5 Year on pump)*

The new Biotec Screenmatic² is a flow through filter that is very simple to operate and gives the best cleaning results for the least effort.

As the filter removes solids from the pond they are collected on a continuous belt filter that allows water to pass through it. A sensor detects when these have built up and starts a motor that moves the belt, solids are then scraped off the belt into a waiting collector basket. This process ensures that the filter is always operating at maximum efficiency. An LED controller monitors the system.

In the bottom of the filter there are several foams that act as bio media, promoting the growth of beneficial bacteria. These are only in contact with water that has already been cleaned by the belt filter and so will rarely need cleaning.

The Screenmatic² is available on its own or as part of a set with the New Aquamax Eco Premium pump and a Bitron UVC.

Evolution Aqua Eazy Connectors

This range of flexible PVC fittings make connecting your filter and pump quick and easy. Eazy connectors are reusable so you can swap things round whenever you like. You can get a perfect seal every time and there's no waiting for glue to dry. Imperial to metric connections are no problem due to the flexibility of these connectors.

These are only suitable for Class C pipe. Call us to make sure they'll fit your pipe.

EVOLUTION
AQUA

nexus eazy

NEW

Evolution Aqua Nexus Eazy and Nexus Titanium 220/320+

Now available with Integrated Titanium UV Clarifier – Smart Design, Maximum Performance

The dedicated clarifying chamber incorporates Titanium enhanced UV units engineered to balance flow rate, contact time, and water clarity. This advanced design delivers superior UV transmission and faster green water removal compared to standard UV systems.

Advanced UV technology targets algae up to **1.5x faster** than traditional systems, helping you achieve clear water quickly while maintaining a healthy pond environment.

The re-designed Nexus Eazy uses amazing Micro K Plus Media in a mechanical filtration static bed. This gives much better mechanical filtration and clearer water. It still uses the normal sized media in the fluid bed for outstanding biological filtration.

Maintenance is simple and the Nexus can be installed as either gravity or pump fed. You can add more media and a bigger air pump to increase capacity.

To set up your Nexus you'll need a filter pump, an air pump and a UV to control green water. You will also need to connect to your pond using either a bottom drain or a pump. We stock all of the extras you need at great prices, give us a call and we'll talk you through the whole process.

An easy to install kit is now available to convert your Nexus Eazy to be fully automatic. It includes powered valves and an electronic controller that will totally automate the cleaning cycle to save you time, hassle and mess. See our website for more details.

AUTOMATIC

Nexus Eazy Pod and Eazy Pod Complete

This great little filter uses mechanical and biological media to provide your pond with 'gin clear' water. It was redesigned to include slide valves on the inlet and waste outlet. There is also a rubber connector to join the filter outlet to pipework up to 3". Each Pod comes with 35 litres of K Plus Filter Media. Easy to clean without getting your hands wet or dirty it is the answer for medium to large goldfish and koi ponds. It is now available in three different models so you can pick the Eazy Pod that best suits your needs. Increase the capacity of the Eazy Pod Complete by installing an additional UVC such as the EVO UVC on page 70.

A new automatic version is available that comes with all the kit to make the filter clean itself. See our website for more details.

All Eazypods are now available in Green or Grey.

Koi Filters

Evolution Aqua Tempest Pond Filter

2 year guarantee

NEW

Use this innovative filter for crystal clear pond water.

Easy to install this new filter, from UK brand Evolution Aqua, has a unique patent pending air syphon design to simplify cleaning. The filter contains hi-tech K+ Media that are agitated and cleaned by air that is drawn into the filter as it empties. Particles down to 1 micron in size can be filtered out by the K+ media.

Water is pumped into the filter from the pond and the floating K+ rises to the top of the filter body, forming a mechanical barrier to trap the debris in the water. The waste stays there until the cleaning cycle disturbs it and it is flushed away.

Cleaning is easy, turn off the pump and open the waste valve. Air is drawn into the filter, causing turbulence in the water to dislodge any trapped waste. The dirty water then exits the filter leaving only the cleaned media behind. It is important that the filter is installed upright for it to work (installation diagrams on our website).

Multiple Tempest filters can be installed in parallel on larger ponds, they can be used as the sole filter or alongside another filter to improve clarity.

- Easy to install
- Easy to clean
- Uses 7 litres of K+ Media (supplied)
- Filters down to 1 micron
- Class Leading surface area

£299.95

Max Pond Size Ltr	Inlet Pressure Pipe*	Outlet Pressure Pipe*	Drain/Waste Size	Max Flow Rate	Optimum Flow Rate	Dimensions mm
5000	1 ½" (50mm)	1 ½" (50mm)	1" (32mm)	7500Lph	5000 Lph	1100 x 350 x 200

*To install using hose instead of pressure pipe you'll need to fit a reducing sleeve (EAM35050) and a 1 ½" solvent stepped hosetail (EAHOSE15) inside each slide valve.

Advanced Filter Media

K1 Micro Filter Media

K1 Micro uses the experience and knowledge developed over 20 years of research and development by Evolution Aqua into moving filter beds to bring you an excellent filter media, an improvement on the original K1.

- 950m² per m³ protected surface Area
- Provides a large surface area for bacteria to colonise
- Increased protection for the bio-film
- Provides mechanical and biological filtration
- Reduces back pressure on pumps • Improved solids handling
- Increased flow rate • Ideal for use in bead filters, conventional pond filters, marine and freshwater aquarium filters
- Improved cleaning

K1 Micro 1 Litre £12.99

K1 Micro 25 Litre £72.99

K1 Micro 50 Litre £120.99

K+ Advanced Filter Media

Advanced media with a huge surface area for better filtration.

This latest media, from UK brand Evolution Aqua, has a unique manufacturing process that adds minerals and enzymes to the media as it is made resulting in media that outperforms its competitors because of its high surface area and speeds up the time taken to mature your filter.

- Class leading surface area 1350m² per m³
- Vast protected surface area 1025m² per m³
- Filters mature faster
- Added minerals
- Unique design for stable bio-film development
- Exceptional solids removal

K+ Media 25 Litres £54.95

K+ Media 50 Litres £89.95

Advanced Filter Starters

Oase DuoBoost Filter Starter and Pond Clarifier

Use DuoBoost to mature a new filter or improve water quality in an established pond. This new treatment from Oase works in two ways. First it adds beneficial bacteria and enzymes that remove organic waste, ammonia and nitrite that are a problem in new pond and filter set ups, helping to keep fish safe from the harmful effects. Next they dissolve slowly releasing important trace elements and minerals that are often missing from garden ponds.

You can put DuoBoost straight into the filter or, using the net bag provided, into the pond. Choice of two sizes of gel ball.

DuoBoost 5 cm 250 ml for ponds up to 20,000 litres **£13.99**

DuoBoost 2 cm 250 ml for ponds up to 30,000 litres **£18.99**

DuoBoost 2 cm 2.5 litre for ponds up to 90,000 litres **£49.99**

Evolution Aqua Pure+ Filter Start Gel

Kick start your new filter with Pure+ Gel.

From UK brand Evolution Aqua, this new gel is a live, concentrated bacterial culture for use in new pond filters. The gel will stick to filter media helping the bacteria to colonise to your filter, fast. The bacteria will soon start to convert ammonia and nitrite so your fish are less stressed.

Evolution Aqua Pure+ Filter Start Gel 1 Litre – treats up to 10,000 litres

£21.45

Evolution Aqua Pure+ Filter Start Gel 2.5 Litre – treats up to 25,000 litres

£41.45

Automatic Fish Feeders

Evolution Aqua evoFeed Automatic Feeder

2 year guarantee

A new automatic fish feeder for medium and large ponds. It can be programmed to dispense food at timed intervals throughout the day. The distance the food is propelled and the length of time it is dispensed for are adjustable.

- Weatherproof
- 6 litre capacity
- Takes 3-10mm pellets (not flakes or sticks)
- Built in rechargeable battery (indoor charger cable included)
- Operates for 3 months on a single overnight charge
- Feeding range 1-3 metres 120° angle
- Strong motor and extra ventilation to prevent the food from clogging
- Fixing pegs included for secure placement at the pond edge

£164.95

Bermuda Automatic Fish Feeder

Easily feed pond fish without being there with the Bermuda Automatic Fish Feeder. Set the timer to dispense the correct amounts of fish food, up to four times per day.

- Capacity 6 litres
- Battery powered 3 x AA (not included)

Automatic Fish Feeders

Velda Pro Feeder

This hi-tech fish feeder from Velda is the last word in pond feeders. The main body can take any kind of food (even flake food) up to 12mm without clogging due to its interchangeable delivery screws. The electronic control unit allows digital programming of up to 20 feeds per day. Mains powered with a battery back-up and complete with a strong bracket/stake for mounting, this feeder is the perfect solution for regular feeding with complete control either during holidays or simply to help you out with your busy lifestyle. 3 litre capacity.

£349.99

Velda Fish Feeder Easy

This new and improved version of the Velda Easy Feeder has an easy access control panel and is simple to use. You can set it to feed several times per day as you require. Sturdy stake for easy positioning at the pond edge.

- Waterproof 2.5 litre see through hopper
- Different feeding screws for different sizes of pellets and sticks

£209.99

Sinking Pellets

Now in its 26th year

SPECIAL OFFER – 3 FOR 2

when you buy 2 Super Saver bags. **Save up to**
Mix and Match the cheapest is FREE **£49.99**

Bradshaws' Wheatgerm Pellets

This is a cereal-based food that is easy for your fish to digest. This is important when the temperature is cooler at the beginning and end of the year when the metabolism of fish is slow, although you can feed wheatgerm all year if you wish. Wheatgerm is a floating food.

- 1.8 Kg Re-sealable Pouch** £21.99 £12.22 per kilo
- 3.6 Kg Re-sealable Pouch** £35.99 £10.00 per kilo
- 6 Kg Super Saver Bag** £44.99 £7.50 per kilo

Bradshaws' Koi Pellets

Designed for koi carp and other big fish, these pellets float on the surface. Usually for feeding in the summer period due to their high protein content.

- 2 Kg Re-sealable Pouch** £21.99 £11.00 per kilo
- 4 Kg Re-sealable Pouch** £36.99 £9.25 per kilo
- 6 Kg Super Saver Bag** £42.99 £7.17 per kilo

Bradshaws' Pond Sticks

Our most popular food, suitable for all types of pond fish. Pond sticks float on the surface and are easily crushed to allow smaller fish to feed on the crumbs. For feeding in the April to September period.

- 1 Kg Re-sealable Pouch** £16.99 £16.99 per kilo
- 2 Kg Re-sealable Pouch** £24.99 £12.50 per kilo
- 3.5 Kg Super Saver Bag** £35.99 £10.29 per kilo

Bradshaws' Pond Flake

This easily digestible food is quite delicate so any size of fish can eat it by nibbling the edges of the flake or eating the crumbs. It floats on the pond surface.

- 675g Re-sealable Pouch** £25.99 £38.50 per kilo
- 1350g Super Saver Bag** £41.99 £31.10 per kilo

Bradshaws' Sinking Pellet

These are pellets that sink straight to the bottom of the pond (unless they get eaten on the way down!). It's designed for bottom feeding fish like tench, sterlet and sturgeon.

- 5 Kg Super Saver Bag** £49.99 £10.00 per kilo

All Bradshaws' own fish foods offer a well-balanced diet with all the fats, carbohydrate, protein, minerals and natural vitamins needed to keep your fish healthy and looking great.

Fish Food

Tetra Floating Sticks

A complete staple food for all pond fish. The UK's best-selling pond food. For feeding at all times of the year when the water temperature is above 10° C, this food floats on the surface but softens quickly allowing fish to feed easily.

780g	£16.49	£21.15 per kilo
1.2kg bucket	£22.99	£19.16 per kilo
1.68kg	£28.99	£17.26 per kilo

A floating flake food for all cold water fish, either pond or aquarium.

390g	£15.49	£39.72 per kilo
650g	£23.99	£36.91 per kilo
1kg	£29.99	£29.99 per kilo

Only feed your fish what they can eat in 5 minutes. Always remove uneaten food.

Plants

Adding plants to your pond is a great way of adding colour to your garden, but not only that – it can improve the overall health of your pond by helping to remove harmful nitrates and reducing algae blooms, meaning your fish are happier too!

Take a look at our helpful guide on how to get started with planting your pond. Not only do we sell a huge range of marginal, oxygenators and lilies but we also stock everything else you will need to get started, such as planting baskets (P90), substrate and pond gravel (P92).

Helpful hints on Planting a Pond

Suggested planting density for pools

Water Lilies	1 per 2–3m ²
Marginals	5 x 1 litre or 3x3 litre plants per 2–3m ²
Oxygenators	2–3 bunches per m ²
Floating Plants	2–3 bunches per m ²

Planting Tips:

Plant your basket as in the diagram. You don't need hessian if you use a planting bag or sock.

When you've planted your basket, immerse it in a bucket of water before putting it in the pond. This stops soil from fouling the pond.

- The planting instructions for all plants can be found on the reverse of the label
- Small pots should be secured to stop fish knocking them over
- Marginals look best in groups of 3–5 of the same variety
- Approximately 30–40% of the pond surface area should be covered to provide shade for fish and reduce algae growth
- Short growing oxygenators can be placed on marginal shelves, deep water varieties are best planted but can be left loose in the bottom of the pond
- Simply place floating plants on the pond surface
- Plants in 9cm solid pots should be transplanted into mesh pots to allow water and oxygen to freely circulate the roots. Plants in 1 litre and larger pots are ready to be placed directly in your pond
- Lay out your planting as you would a flower arrangement with tall plants at the back and low plants at the front

Marginal plants are a great way to brighten up your pond and easy to plant. Oxygenators do as they say, adding extra oxygen which is important for maintaining a healthy pond balance. Turn the page to see a selection of plants.

3 for £24.99 on all 1L Marginals and Oxygenators
Must be 3 identical plants

Another great way of adding vibrant colours to your pond is by planting a water lily. Water lilies will also help to shade your pond, resulting in less green water. Lilies can get quite big, but we also sell pygmy or miniature lilies that are suited to smaller ponds. They come in a range of colours, just ask us or look at our website. Turn the page for more varieties.

Side view

Square Textile Planting Bags

Special design contains plant roots and prevents excessive growth. No hessian liner is needed as the fine weave of the planter stops soil from escaping into the water. The flexible base means that it can be stood on an uneven pond bottom or shelf. Sold in sets of two.

Small	18 x 18 x 18cm	£5.99
Medium	25 x 25 x 20cm	£6.99
Large	30 x 30 x 25cm	£8.99

Planting Baskets

Quality aquatic planting baskets. Unlike normal pots they let the water flow freely in and out allowing plants to take up more nutrients from the water. Sold in packs of three unless stated.

3 x Mini Square	18 x 18 x 9cm	£3.99
3 x Medium Square	23 x 23 x 13cm	£5.99
3 x Large Square	27 x 27 x 19cm	£7.99
3 x Crescent	45 x 18 x 15cm	£11.99
1 x Extra Large Square	35 x 35 x 26cm	£4.99

Pontec PondoHyacinth Artificial Floating Hyacinth

These float, look great and provide some cover for your fish. Popular since the real plant is no longer available in the UK. Has an anchor eye on the bottom so you can keep it in place. Approx. 14cm diameter.

£9.99

Floating Artificial Water Hyacinth

- Realistic
- 23cm (9") across

£8.49

Velda Edging Bag Plant Holder

Perfect if you don't have a planting shelf.

This edging bag plant holder is made from a black fine woven material. It has three tiers of pockets, with a total of 18 pockets of various sizes. Comes with 5 metal fixing spikes. 108cm wide x 105cm high.

£23.99

Lotus Lily Grow

A pack of 6 slow-release fertiliser tablets that are perfect for feeding your lily. Just push 1 or 2 down into the soil at the plant's roots in the spring. Will not encourage the growth of algae or blanket weed.

Lily Grow 6 Tablets £7.99

Planting Tips:

Plant your basket as in the diagram. You don't need hessian if you use a planting bag or sock.

When you've planted your basket, immerse it in a bucket of water before putting it in the pond. This stops soil from fouling the pond.

A. Velda Classic Pond Bottom Substrate

In a natural pond most of the biological activity takes place at the bottom. This substrate gives your pond the same solid foundation. Chosen to promote the growth of friendly bacteria and other micro organisms a covering of substrate is the best way to achieve a natural balance. 1 bag covers approx 1m².

10 Litres **£15.99** 20 Litres **£29.99**

B. Velda Superdensa Oxy Plant Substrate

Soil substitute for oxygenating plants. By not adding soil to the pond you reduce the nutrients which cause algae growth. You're also giving oxy plants the right start so they'll soon be drawing nutrients from the water and reducing algae growth even more.

10 Litres **£18.99**

C. Velda Lelite Water Lily Soil

A specialist water lily soil fortified with blue loam.

10 Litres **£17.99**

D. Moerings Pond Plant Soil

Superb quality aquatic plant soil from Holland. Available in 3 sizes.

10 Litre **£12.99**

20 Litre **£16.99**

40 Litre **£32.99**

E. Velda Pond Gravel

Perfect for the top of your pots. In 8kg/4litre bags in a choice of 2 gravel sizes.

Pond Gravel 4-6mm **£12.99**

Pond Gravel 4-6mm 15Kg **£29.99**

Pond Gravel 8-12mm **£12.99**

F. Hessian Squares

18" squares of hessian to line your planting baskets. Sold in packs of 3.

£3.49

G. Velda Round Floating Planter

A simple but brilliant idea! A covered styrofoam floating ring allows limitless options for pond planting. Can be linked together. Available in 2 sizes.

25cm £15.99 35cm £21.99

I. Velda Square Floating Planter

Just like the round one, only square! This means you can join them together to make a larger island (linking loops included) or even a chequerboard effect. Available in 2 sizes.

25cm square £15.99 35cm square £21.99

H. Velda Floating Plant Oasis

This new floating island from Dutch company Velda is the ideal way to add plants to your pond if you don't have shelves or want to cover some of the pond surface. Simply put the pots into the island and float it. Use a mixture of tall and low, spreading plants and the plants will grow to cover the island and make it look natural. Takes 6 pots that are 9cm square. This is the 'small' size sold in most garden and aquatic centres.

£14.99

J. Velda Pond Plant Planting Socks

The plant sock is ideal for covering pond edges and curves with plants. It stops the soil from leaching into the water and controls root growth. Available in 2 sizes.

10 x 80cm £9.99

15 x 80cm £10.99

K. Velda Super Plant Growth Balls XL

These fertiliser balls can be placed at the roots of your pond plants to ensure fabulous growth and beautiful flowers. Easy to use and do not encourage algae growth.

Growth Balls 1.21kg £15.99

Hosepipes

SAVE £10

Heron Stop Deterrents

These clever products are both attractive and effective. Score one for pond keepers and fish, zero for the herons!

Heron Stop Reflector (A) **£26.99**
Heron Stop Spinner (B) **£38.99**

Velda Brilliant Pyramid

Bright, shiny, floating pyramid to scare off herons.

£11.99

Heron Lookalike

Having this realistic heron near your pond should help stop the real thing. Herons are territorial so usually avoid each other. We find these are most effective if you move them around occasionally. 67cm tall

£29.99

Bermuda Pink Flamingo

Cute plastic flamingo. 63cm tall

£14.99

Deterrents

Velda Pond Protector Pro Everything you need to make an electric fence around your pond to protect against any unwanted animals or birds. It's a great way to keep herons form your pond. This set can protect 100 metres of pond edge with 2 wires to keep your fish safe.

- LED lights indicate if it is working correctly
- 20 stakes with feet and points for different ground types
- 200m wire in total
- Metal earthing rod for proper grounding
- Mains powered

£369.99

Velda Pond Protector Electric Fence

A complete kit to make a 40m fence around your pond. It gives animals a harmless but deterrent shock when they touch it. Kit includes:

- Transformer
- 10 Insulated poles
- 80m of fence (40 metres with 2 strands)

Need the fence a little longer? The extension set will increase the fence length to 80 metres of two strands.

Pond Protector Fence £79.99
Extension Set £54.99

Velda Heron Stop Fence

A near invisible fence for around the pond with jingle bells that ring when it is touched. Will scare off a heron for days after it is triggered. Will protect 12.5 metres of pond edge. Includes:

- 8 rods
- 25 metres of nylon line (set up as 2 strands)
- 8 jingle bells

£37.99

Velda Laser Guard

The Laser Guard uses the latest technology to protect your pond from Herons. It has a range of around 12 metres at an angle of 100° and fires a flashing light with a changing frequency. It also projects a series of moving laser beams that the heron sees as moving objects. Finally, it emits the sound of a heron in distress, barking dogs and the cry of a poisonous frog to scare them off for good. Only detects creatures that are cat sized or larger. It does not operate at night so it won't annoy the neighbours.

£249.99

Award Winner

Pond Pyramid Net

This innovative new product from United Aquatics won the Best New Product award in the Water Gardening category at the Aqua show.

The Pond Pyramid Net keeps leaves, debris and predators out of your pond. The frame's telescoping design allows it to be placed on uneven ground, and the net's aluminium frame means it is rust proof and built to last. The mesh netting comes already pre-assembled on the frame, meaning that no assembly is required. 30 stakes are included to ensure that the net stays in place. Installation is quick and easy. Simply pull the net out of the box, place the net and the frame on top of the pond and secure the net with the stakes.

- Great for ponds up to 4m x 5m
- 6m x 6m (20' x 20'), 6mm (¼") mesh netting
- Folds to less than 1m tall for easy storage

£134.99

Pond Nets

Blagdon Clearview Cover Nets

Strong, durable, double weave black fine net. The black mesh makes the net nearly invisible when lying on the water surface.

- Includes Net fixing pegs

Size metres	Approx. (feet)	Price
3 x 2m	10' x 6'	£13.99

Metal Pegs **49p each**

PondKraft Heavy Duty Pond Nets

Designed for professionals and serious pond keepers this range of nets is built to last. They are the strongest nets we've ever found and have a revolutionary method of joining the net to the pole, normally the weakest point. This Armoured Clickfast system lets the handle push right inside the metal bracket on the net head and spreads the load over a much wider area. The range includes 3 types of net head and the 3 metre (9'9") telescopic pole. The koi sock is hand held and is the safest way to handle large fish. The handle features rubber grips and the Armoured Clickfast head.

- (A) Catch Net 41 x 46 x 30cm deep 8mm rubber coated mesh £25.99**
- (B) Koi Pan Net 60 x 60 x 15cm deep 6mm mesh £28.99**

Cloverleaf Blanket Answer All Season

Gets rid of Blanketweed

Blanket Answer All Season is a unique formula which succeeds where many commercial bacteria cultures will fail. Specially formulated to work year round. No need to switch off your UV. Blanket Answer All Season is safe for all pond fish, plants and biological filtration systems.

200g	Treats 2,500 litres (550 gallons)	£12.99
500g	Treats 6,250 litres (1,376 gallons)	£19.99
800g	Treats 10,000 litres (2,200 gallons)	£28.99
2Kg	Treats 25,000 litres (5,500 gallons)	£58.99
4Kg	Treats 50,000 litres (11,000 gallons)	£99.99

Cloverleaf Blanket Answer

An award winning product, loved by koi keepers nationwide. The blend of enzymes and minerals are designed to combat blanket weed while still being safe for your fish, plant life and biological filtration. Simple to use, just add the powder to a watering can of pond water and sprinkle over the surface of the pond. No need to turn off your UV during treatment. One dose is usually enough.

200g	Treats 2,500 litres	£10.99

2Kg	£58.99
4Kg	£99.99

NEW

Cloverleaf Sludge Answer+ Advanced

A powerful, 100% natural bacterial gel designed to break down organic waste and sludge in all garden and Koi ponds.

It's simple to use, and the unique gel formula sticks to pond surfaces, including the liner, while some sinks to the bottom where sludge builds up. This helps protect the beneficial nitrifying bacteria from UV at the surface, so more of them stay active where they're needed most.

Unlike many standard liquid treatments that can lose up to 80% of active bacteria to UV, this gel keeps working for longer.

250ml Treats 5,000 litres (1,100 gallons) **£17.99**

500ml Treats 10,000 litres (2,200 gallons) **£24.99**

1 litre Treats 20,000 litres (4,400 gallons) **£34.99**

5 litre Treats 100,000 litres (22,000 gallons) **£99.99**

NEW

Pure Bale in a Bottle

Stop blanketweed - naturally

Pure Bale in a Bottle is a unique 2-in-1 gel that blends matured barley straw with live beneficial bacteria.

Made from natural ingredients and safe for all pond wildlife, it helps create healthy pond conditions while keeping water looking naturally clear. And unlike traditional barley straw bales, you get the same trusted results without the mess - just dose and let it get to work.

500ml For ponds up to 12,500 litres for 4 weeks **£14.95**

1 litre For ponds up to 25,000 litres for 4 weeks **£24.95**

NEW

Tetra Pond Peat & Straw Extract

Reduce algae and blanketweed growth naturally.

Helps protect pond water from excessive sunlight, reducing the risk of algae growth. It contains natural extracts of peat and barley straw that release high-quality humic substances, gently darkening the water to provide natural sun protection. The product can be used all year round and is especially recommended in spring, when pond plants are not yet growing strongly enough to compete with algae.

Shake well before use. Add 50 ml per 1,000 L of pond water once a month, spreading the liquid evenly across the pond.

250ml **£9.99**

500ml **£14.49**

Blank Weed

Eco Pond Barley-bio Algae Control

An environmentally friendly product that controls algae and blanketweed growth by starving the algae and changing the water chemistry.

- Contains micro organisms specifically selected for algae control
- Cannot be overdosed
- Safe for fish, plants, humans, pets and wildlife

125ml per 4500 litres initially, then 20-40ml per 4500 litres weekly through the summer.

250ml £12.49

500ml £18.99

1 Litre £29.99

Nishikoi ClearWaters

A new blanket weed treatment that actually kills the blanket weed. The treatment contains Monolinuron, a powerful, fast acting algicide. In tests this product worked amazingly well. Always read the instructions. Use 25ml per 500 litres of water.

2200 gallons (10000 litres) £19.99

5500 gallons (25000 litres) £38.45

11000 gallons (50000 litres) £64.99

Pond Treatments

Blagdon Green Away

A great short-term solution to green water, as it will kill off the algae that cause the problem. The dead algae will sink to the bottom of the pond so use in conjunction with a sludge treatment.

250ml Treats 11365 litres **£14.99**

1 litre Treats 45460 litres **£29.99**

Velda Bio Oxydator

Removes sludge from the pond bottom. It works by adding oxygen that promotes the development of micro organisms that convert the sludge into nutrients.

1000ml Treats 10m² **£8.99**

2500ml Treats 25m² **£14.99**

Blagdon Duckweed Buster

A natural product, prevents growth of duckweed by changing water chemistry and creating conditions which prevent it spreading. Does not affect other plants or fish.

250ml Treats 2273 litres **£17.99**

500ml Treats 4546 litres **£31.99**

1 litre Treats 9092 litres **£52.49**

Blagdon Fresh Start

Removes chlorine from tap water. Use when you fill your new pond or top-up an existing pond.

250ml Treats 2273 litres **£14.99**

1 litre Treats 9092 litres **£29.99**

Blagdon Clear Pond

Treats cloudy water by making the particles sink to the bottom. Use in conjunction with a sludge treatment.

250ml Treats 5682 litres **£14.99**

1 litre Treats 22730 litres **£29.99**

Blagdon Sludge Buster

Works to remove the build up of debris on the bottom of the pond. Treats 9000 litres total but is split into 4 sachets.

£18.99

Pond Treatments

NEW

Tetra Pond Season Start

Promote Fish Health in Spring

This product revitalises pond fish, plants and microorganisms after winter. In spring, ponds are often unbalanced: fish immunity is weakened, oxygen levels can be low and excess nutrients may cause poor water quality and algae growth. Season Start helps strengthen fish with minerals, trace elements and B vitamins, while binding excess phosphate and supplying iron to support healthy plant and microorganism growth. This makes it an ideal water conditioner for preparing your pond for the new season. Add an air pump to make it even more effective (see page 24).

Shake well before use. Dose 50 ml per 1,000 L weekly, spreading evenly in the water.

250ml £9.99

500ml £14.49

NEW

Tetra Pond Test 7in1

Keep your pond water healthy and balanced with the quick and easy Tetra Pond Test 7in1. This simple dip-and-read test strip lets you check seven essential water parameters in just one minute – helping you protect your fish, plants and the natural balance of your pond.

Fast & Easy to Use

1. Dip a test strip into the pond water.
2. Swirl gently for 2 seconds and remove.
3. After 60 seconds, compare the colours to the chart on the container.

It's that simple – clear results in minutes, no complicated equipment required.

Tests 7 Key Water Values

The Tetra Pond Test 7in1 measures:

- Carbon Dioxide (CO₂) – Essential for healthy plant growth
- pH Level – Crucial for fish wellbeing and stability
- General Hardness (GH) – Supports vital fish functions
- Carbonate Hardness (KH) – Helps stabilise pH levels
- Nitrite (NO₂) – Harmful to fish even at low levels
- Nitrate (NO₃) – Plant nutrient, but harmful in excess
- Chlorine (Cl₂) – Often present in tap water and dangerous to pond life

Maintaining the correct levels helps ensure a healthy biological balance for fish, plants and beneficial microorganisms.

25 test strips £13.99

Tetra 7in1 Test

Quickly and reliably measures the seven most important water values in a single step.

PondKraft Solar Bird Bath Stone

1 year guarantee

This pretty bird bath will look lovely in any garden or on a patio. It's solar powered so there's no need for cables, wires or hoses. Simply unpack, fill with water and enjoy. It will provide a safe place for birds to drink and you will have the calming sound of trickling water to help you relax.

The solar panel comes with a built-in battery so it will charge up when the sun shines and the fountain can be used whenever you like. Four bright LED lights will come on automatically after dark to illuminate the fountain.

There's a choice of different fountain heads supplied so you can choose your favourite.

Made from sturdy poly-resin it stands 78cm tall, that's a little over 2'6" and weighs a solid 8 kgs.
